ANOTHER LARGE ST. LOUIS FIRE

Spectacular Blaze While Mercury Stood at 97.

DAMAGE IS OVER \$300,000

Mill, Warehouse and Lumber Yards of the William G. Frye Manufacturing Company Sustains the Bulk of the Loss—Fire Chief Swingley and Several of His Men Overcome by the Intense Heat.

St. Louis, June 17.—A spectacular fire, which firemen were called out to battle with while the mercury was at 97, burned fiercely for four hours and damaged the mill, warehouse and lumber yards of the William G. Frye Manufacturing company in excess of \$300,000.

The general offices, car barns and shops of the United Railways company were endangered, and not seriously damaged, and heavy electric feed wires were melted by the terrific heat. Car lines in the western and southwestern districts of the city were put out of commission for several hours.

Fire Chief Swingley was overcome by heat, as were also several other members of the department.

While the fire was at its height a demand for protection was made upon the police by John T. Larson, treasurer of the Loose Patent Door company, which operates a large mill and owns one of the largest lumber storage plants in the city.

Mr. Larson drew attention to the similarity in circumstances surrounding this fire and the fire some hours before, which destroyed five large manufacturing plants, covering an area of eight acres.

LOSS WILL REACH A MILLION

Conservative Estimate Made of Big Blaze at St. Louis.

St. Louis, June 17.—Losses conservatively estimated at more than \$1,000,000 were sustained in a fire which raged for four hours in manufacturing district bordering for four blocks the terminal railroad yards in the southwestern part of the city. The plants of the Hutting Sash and Door company, Fatman & Miller Planing Mill company, Missouri Staircase company, Koken iron works and the Mound City Box company were practically wiped out.

LARGE CROWD IS EXPECTED

Great Preparations for Taft Silver Wedding Jubilee.

Washington, June 17.—Descendants of every president of the United States since 1861 have been invited to the silver wedding celebration which President and Mrs. Taft will give at the White House June 19. Records of the White House and state department have been carefully searched to find the names of living blood relations of all former presidents and the list is believed now to be complete except the relations of President McKinley. The White House has appealed to George B. Cortelyou, former secretary to Mr. McKinley, for the names of members of the McKinley family who are still living and invitations will be forwarded to them with all possible expedition.

Elaborate preparations have been made for the entertainment of probably the largest crowd that has ever been present at a function in the White House.

BAN PLACED ON CORNERS

Drastic Rule to Supplant Old Board of Trade Regulation.

Chicago, June 17.—A more drastic anti-corner rule than ever has been in force here was adopted by the Chicago board of trade by a vote of 348 to 191. The rule is the outgrowth of the recent investigation by the board into the alleged manipulation of May wheat.

The rule provides that in the event of a default a committee appointed by the president shall determine as near as possible the real commercial value of the grain as a basis for settlement. As liquidated damages the seller also will pay the purchaser not less than 5 per cent nor more than 10 per cent of the value of the commodity as established by the committee.

Bees at Work.

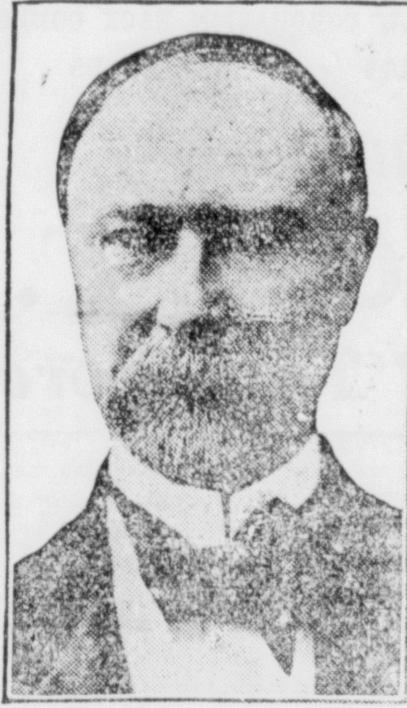

Bees work advantageously within a radius of three miles of the hive, but they will go eight miles to get honey from a field of buckwheat. They are very partial to the buckwheat bloom. Bees have a most delicate developed scent. When a bee leaves its hive it rises in the air and scents honey bearing flowers in the wind and follows the scent to the flowers.

Kerosene Explosion Fatal.

Oakes, N. D., June 17.—Miss Christine Melby was fatally burned as a result of a kerosene explosion. She turned oil on a smoldering flame in the cook stove and the explosion blew the bottom out of the oil can and scattered the burning oil over the girl's clothing. Every bit of clothing was burned from her body. She died soon afterwards.

CHARLES W. FAIRBANKS.

Will Entertain President Taft at Marion, Ind., July 3.

BEVERLY SOON TO SEE TAFT

President Will Move to Summer White House on July 1.

Washington, June 17.—President Taft has been unable to complete his summer plans owing to the uncertainty of the date on which congress will adjourn, but it is announced that the president, Mrs. Taft and their children will go to the summer White House at Beverly, Mass., July 1. Mrs. Taft and the children will remain there the rest of the summer, according to the present plan.

The president's stay at Beverly will be brief, as he will almost immediately leave for Marion, Ind., to address the Indiana State Bankers' association July 3. He will be the guest of former Vice President Fairbanks.

President Taft will celebrate the Fourth at Indianapolis. Returning from his Indiana trip the president expects to reach Washington on July 6.

COX PROSECUTION IS AGAIN HARD HIT

Second Indictment Against Ohio Boss Quashed by Judge.

Cincinnati, June 17.—Unless Prosecuting Attorney Henry T. Hunt can devise some plans that now appear to be unknown to legal authorities the end has come of the celebrated case in which George B. Cox, the political leader and financier, was charged with perjury.

The finish was almost as sensational as the start, inasmuch as bias and prejudice affidavits marked the closing day, just as they have featured the case during its entirety.

Judge William Dickson, upon hearing a motion from the prosecuting attorney here asking for a rehearing of the case, overruled the motion and in the same breath quashed the second indictment against Cox. The first indictment already had been quashed by Judge Dickson and it was the intention of the prosecutor to bring Cox to trial on the second indictment.

UNCOVERS GUNS OF MAINE

After Superstructure and Mast of Spar Deck Above Water.

Havana, June 17.—A greatly increased area of the wreck of the battleship Maine was exposed to view when the water level within the cotermin had been lowered to a total of ten and one-half feet below normal.

The portions of the ill fated warship now above the water include the whole of the after superstructure and most of the spar deck aft of the port turret.

Thus are revealed the ten-inch guns pointed aft with the tampions still in their muzzles; all of the engine room superstructure and confused masses of iron forward and apparently what formed the upper part of the bow section.

Everywhere the iron work exposed if not shattered by the explosion has been so corroded as to be reduced to mere shells, making it highly probable that the plan to repair and float any part of the ship must be abandoned because of complete structural degeneration.

No trace of bodies has been found in the decks or superstructures.

The whole interior of the wreck is choked with mud.

KANSAS HITS OIL COMPANIES

Supreme Court Decides Against Three Standard Oil Subsidiaries.

Topeka, Kan., June 17.—The Kansas supreme court handed down a decision in the state's suit against three subsidiary companies of the Standard Oil company of New Jersey, prohibiting them from combining to stifle competition.

Each of these companies is chartered in Kansas to produce, purchase and otherwise procure crude oil, to refine it and to market it. No one of the companies has been doing this, according to the findings. On the contrary, each has been working as a part of a system. The state asserted that this division of labor showed an illegal agreement between the three.

EXTRA SESSION WAS GOOD MOVE

Political Observer Says Taft Acted Wisely.

LET DEMOCRATS HAVE WAY.

Investigations Made This Year Will Probably Be Forgotten Before the Next Presidential Campaign—Committee on Military Affairs Considers Paying Members of the Militia.

By ARTHUR W. DUNN.

Washington, June 17.—[Special.]—Without a dissenting voice everybody asserted that President Taft had played the worst kind of politics in calling an extra session of congress. Friends and opponents of Canadian reciprocity, Republicans and Democrats alike, agreed that the president had blundered and that he had made a mistake which would seriously react upon him and probably defeat him next year.

And yet it is possible that he may have done the best thing for himself and his future political success. The suggestion was given me by the last man in the world from whom I would expect a political tip, and he was just voicing what he "heard round about in talking with different people."

Here is the idea.

"Instead of being a mistake, which everybody said it was," he went on to say, "Taft may have played mighty good politics in calling this extra session. He had a Democratic house, and that house had determined to investigate the federal government and tear up things generally. If that was all going on during a presidential year it might make trouble, but it will be all over and forgotten when the campaign is on."

"Then there was the tariff. This reciprocity proposition was sure to be put through some time, and the sooner the better. When it is passed those who wanted it will applaud Taft whether it does them any good or not. Those who feared it will find they were not hurt and will get over their soreness by the time election comes around."

"The fellows who are interested in the tariff will figure out how much they will be hurt by the bills which the Democrats are putting through, and they will be working next year for Taft and Republican success. This extra session may turn out to be the best thing Taft has done."

Costly Militia Bill.

The house committee on military affairs has been holding hearings on a militia bill which proposes to pay the officers and members of the national guard in different states in order to keep up their interest in the organization.

"This bill will cost \$10,000,000 a year," said Congressman Slayden of Texas, a member of the committee, "which is about two-fifths of the cost of the entire army per year under Grover Cleveland."

At the same time there are many men who think that the young men of the country ought not to devote their time and energy to keeping up good militia organizations in the different states unless paid for it. There will be an effort to make a saving in the army by concentrating the forces and abandoning many small military posts and use the money for the militia.

Filled With Statistics.

The Congressional Record is filled these days with statistics on wool. The debate on this phase of the tariff does not bring out anything very enlightening. For the most part the discussion is so technical that not one man in ten in the house understands it. The interesting political feature developed is that quite a number of Republicans are going to vote for the bill.

The Changed Bailey.

In the ten years he has been in the senate Senator Bailey has several times threatened to filibuster against measures he did not want passed. But when in the closing days of the last congress a filibuster nearly defeated something he wanted he announced that he would never engage in a filibuster again unless it was something of vital importance to his state or section.

When Bailey first came to congress he started in to reform the methods of procedure by demanding a quorum vote on every bill that was passed. He finally saw the futility of that, just as he has seen the futility of many other legislative reforms which he thought ought to be inaugurated. In fact, the Bailey of today is not the same Bailey that came to congress twenty years ago.

No Pull at the Navy Department?

A man of considerable prominence went to the navy department not long ago to get something done for a naval officer which would have been all right, but would have necessitated turning down a naval board or official recommendation.

"There is nothing of that kind allowed in the navy department now," he was informed by Secretary Meyer. "We have found that we are getting along much better since we eliminated the political pull and run the department upon lines of efficiency."

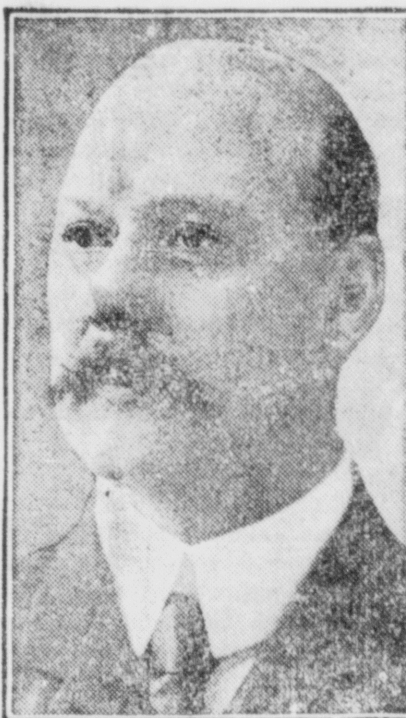

And the request was not granted, although made by a man who had given thirty years of good work to the Republican party without reward.

Defined.

"What is the ear?"
"It is the side entrance to the face."
—New York Press.

JOHN W. WEEKS.

Massachusetts Congressman Defends Woolen Company.

DEFENDS WOOLEN COMPANY

Massachusetts Man Says It Is Not a Monopoly.

Washington, July 17.—Defense of the American Woolen company, a resolution for the investigation of which is pending, was made in the house by Representative Weeks of Massachusetts, who declared that the company could not be considered a trust under any definition of monopoly he had ever heard.

The woolen schedule occupied the house all day. Representatives Weeks and Longworth were among those who spoke against the bill and Representatives Macon and Oldfield, both of Arkansas, and Ayres of New York, for it.

"The American Woolen company," said Mr. Weeks, "in no way controls more than 15 per cent of the industry of the country. It does not control the price of woolen products in this country nor the price of the labor employed by the industry."

PERMITS TREATY WITHDRAWALS

Imperial Conference Concedes Premier Laurier's Plan.

London, June 17.—The imperial conference agreed to a proposal of Sir Wilfrid Laurier, the Canadian premier, which was supported by Sir Edward Grey, the British foreign secretary, to negotiate with foreign governments with a view to obtaining for the over seas dominions the right of withdrawal from any commercial treaty without impairing such treaty with respect to the remainder of the empire. It also agreed to Sir Wilfrid's proposal to appoint a royal commission to visit the over seas dominions and report on trade and resources and the best methods for their development.

A long discussion ensued concerning the establishment of an "all rail" and steamship route. This question revealed numerous differences of opinion and practical difficulties. David Lloyd-George, chancellor of the exchequer, explained that the cost of a twenty-one-knot service was prohibitive and that of an eighteen-knot service enormous. Finally a limited resolution was carried that it was desirable to establish the best possible service.

COOKE EVIDENCE COMPLETE

Defendant Declares He Can Prove Warriner Was Not Short.

Cincinnati, June 17.—The ending of a sensational trial came when attorneys representing the prosecution and the defense in the case of Edgar S. Cooke, charged with embezzling \$24,600 from the Big Four railroad, announced that they would forego arguments to the jury.

The defense was begun and ended and Cooke himself gave practically the entire testimony upon which it rests. He denied emphatically that he had ever stolen a dollar from the Big Four or committed any dishonest act in his life.

"I knew that Warriner was not short," he declared, "and I can prove it if I get the chance."

Woman Burned to Death.

Baudette, Minn., June 17.—Mrs. Hume, a widow, was burned to death in a fire which destroyed the Brown millinery store.

BLAZE IN CANADIAN TOWN

Swift Current, Sask., Suffers \$140,000 Loss by Fire.

Swift Current, Sask., June 17.—This town was threatened by a fire which started in the Great Northern Supply company's building, in the heart of the business section. The International Lumber company's yards, close by, were burned. Much gasoline and oil caused many explosions in the big hardware building of the Anderson & Edmondson implement warehouse.

The Great Northern Supply company suffered a total loss estimated at \$75,000. The International Lumber company, a partial loss, estimated at the present time at \$65,000.

EVENLY DIVIDED ON LA FOLLETTE

REFUSES NELSON'S REQUEST

Senate Declines to Print Comments on Trust Decisions.

Washington, June 17.—A request submitted by Senator Knute Nelson in the senate for the printing as a senate document of comments by Albert H. Walker of the New York bar on the supreme court decisions in the Standard Oil and tobacco trust cases was refused by the senate. When Mr. Nelson made the request Senator Borah asked if that was the document in which Mr. Walker referred to the decisions as the "chitter diatta" of the chief justice.

Senator Nelson thought not, but Senator Borah was insistent.

"If I may object I would like to do so," said Mr. Borah. "I think the senate ought to hear that paper read before it agrees to have it printed."

"The senator from Idaho certainly has the right to object," said Vice President Sherman emphatically. "Let the document be read," said Senator Lodge, "and then we can determine its character."

"The clerk will read," commanded Vice President Sherman. "The Standard Oil decision," read the clerk, repeating the title, "objection, by the chief justice."

That was all, interrupted Senator Lodge. "That is a plenty; let the matter go over." Senator Borah sat down with the satisfied look of the cat that had eaten the canary. The Massachusetts senator looked very green.

BOOST IN LUMBER PRICES

Advances Follow Issuance of Association Lists.

Kansas City, June 17.—After being in session here for five days the hearing of the state's outster suit against the alleged lumber trust adjourned to reconvene in Jefferson City June 27.

Albert Bushnell, a lumber commission dealer of this city, was the only new witness. His testimony was that yellow pine prices had gone up from \$10 to \$29 a thousand feet in the last fifteen years and that the increases generally followed the issuance of price lists by the Yellow Pine Manufacturers' association.

First Wind Gauge.

An instrument for measuring the force of the wind was first contrived in 1667.

Sheep—Native, \$2.50@4.35; yearlings, \$4.00@4.90; lambs, \$4.50@7.10.

How Progressive Senators Regard His Candidacy.

POINDEXTER WRITES LETTER

Washington Senator Sends Epistle to Minneapolis Legislator Declaring His Belief That Without Exception the Progressives Would Be Delighted to See La Follette Nominated for President and Would Want to Bring About That Result.

Washington, June 17.—A good deal of interest has been manifest in Washington on a report that Senator Poindexter of Washington addressed a letter to W. I. Nolan of Minneapolis in which he made the statement: "I think without exception the (progressives) would all be delighted to see Senator La Follette nominated and would do everything they can to bring about that result."

While progressives have declined up to this time to discuss presidential politics with any degree of freedom it is known that they are divided on the subject. Six of them are understood to be for La Follette, while six others are said to be either opposed to his candidacy or at least are so lukewarm as to justify the belief that they secretly doubt whether he can be nominated.

The six progressives who are understood to be skeptical of the La Follette candidacy are: Kenyon and Cummins of Iowa, Crawford of South Dakota, Dixon of Montana, Borah of Idaho and Brown of Nebraska.

Kenyon Favorable to Taft.

It is known that Senator Kenyon is favorable to the renomination of President Taft, although he has made no formal announcement to this effect. Senator Cummins is on the fence. Senator Borah is bitterly hostile to Mr. Taft. He favors the nomination of Theodore Roosevelt. He does not take the aspirations of Senator La Follette seriously, his friends say. Senator Dixon is favorable to the president and it is the understanding that Senator Brown will be found supporting the president.

Senator Crawford's position is uncertain, which is evidenced by this statement which he made:

"I am not prepared to join in any predictions being made," he said, "when his attention was called to observations in the letter addressed to Mr. Nolan by Senator Poindexter. 'I prefer to make no statement at all. I have been misquoted in the press as being against Mr. La Follette, whereas I have never spoken to any one of the matter. I will say, however, that I am friendly to Mr. La Follette, but I have never participated in any of the conferences in which presidential politics have been discussed and am therefore not advised as to the situation.'"

Despite this statement Senator Crawford is classified with the faction of the progressives who are disposed to regard the La Follette candidacy as impracticable at this time.

Supporters of La Follette.

The senators who are believed to be strongly for Mr. La Follette are: Clapp of Minnesota, Bourne of Oregon, Bristow of Kansas, Gronna of North Dakota, Works of California and Poindexter. These are the irreconcilables who, with Mr. La Follette, may be depended upon to go to the mat in any and every struggle with the regular leadership of the senate. The seven senators named are at enmity with the administration and rarely do any of them ever visit the White House. They are regarded by administration supporters as hostile to President Taft.

An effort has been made recently by administration supporters to give the impression that practically all the elements of the party are ready to unite on Mr. Taft. This has angered the La Follette group. Among those who, according to report are about to swing into line for Mr. Taft is Gifford Pinchot, who was dismissed from the forest service early in the present administration. Persons close to Mr. La Follette deny in the most emphatic language that Mr. Pinchot will support Mr. Taft.

It is understood here that in due season an announcement will come from Mr. La Follette that he is a candidate for the presidential nomination. That Mr. La Follette will make a fight against the president in the Republican national convention of 1912 is a certain sign he will have the support of a big block of progressive delegates who will be sent to that body from various states.

Beheaded by Steam Plow.

Saskatoon, Sask., June 17.—Herman Gesche was beheaded while driving a steam plow outfit on the farm of Paul Smerfeldt. An explosion of the engine threw the man backward on the levers of the plows and then to the share.

Neck Broken by Fall.

Flandreau, S. D., June 17.—Mrs. Mary Murphy, aged eighty-five, fell down stairs and broke her neck. She had gone upstairs to close the windows on account of a storm.

those who use more than 1,000 per month will be given a discount of ten per cent. This is about one-half the rate paid in St. Cloud."

The statement is made that deposits in postal savings banks cannot be attached in any state in the Union and that money thus deposited is not subject to legal proceedings at the instance of creditors, as absolute security must be maintained as to the identity of depositors and courts are helpless to force postmasters to produce their records.

The city clerk of Duluth issued a circus license for Saturday, July 1st, but the protest of the merchants caused its revocation. Duluth has an ordinance that prohibits Saturday circuses in that city owing to the fact that a circus on that day in the week causes a large shortage in the usual week end business, and a circus on the Saturday before the 4th of July was putting it on a little too thick.

The city council of Staples is entertaining a proposition from M. D. Stoner for furnishing that city with electric lights. The gentleman desires a franchise and tells them he will generate his electricity by a dam at the mouth of Crow Wing river, and offers a flat rate of 4 cents based on an annual consumption of 200,000 kilowatts with a lower rate for a larger consumption. The Staples Headlight in commenting on the matter says: "Another feature of Mr. Stoner's offer that should commend it is that the right to sell current for power purposes is reserved to the company. From this it may be seen that the company would be deeply interested in the promotion of manufacturing enterprises at this place. But the prime consideration after all, should be the cost. If a private company can supply light and power to our citizens for less money than it can be done for under public ownership, by all means let us have the private company with its cheaper rates."

LOCAL NEWS NOTES

J. H. Huber arrived from Pine City Friday.

Emil Johnson went to St. Paul this afternoon.

Herman Peterson, of Deerwood, is in the city today.

Mrs. G. W. Northrup went to Ft. Ripley this afternoon.

Step in a Volcano

The Volcano is distinctly a young man's model. It's making a great hit and if you take notice of the best dressed young men about town you'll notice many of them are already wearing our new Volcano.

The Volcano is the very latest model—it has a high arch and a high heel and a very distinctive toe. Stylish? Decidedly yes—and then some. It's a splendid fitter—we show it in a variety of patterns. Come in and look them over.

THE NEW FOUNDRY HAS TRIAL RUN

Newly Installed Machinery is Tried
Out in the Northern Pacific
Ry. Foundry

LEASED TO PARKER & TOPPING

About 150 Men Now Employed—
Description of Most Modern
Foundry in the Country

At seven o'clock this morning the electric motors at the new Northern Pacific railway foundry commenced whirling and the newly installed machinery as given its first try-out or trial run.

The foundry has been leased by the railway to the Parker & Topping Co. for a term of five years. In this corporation C. N. Parker is president; H. W. Topping, of St. Paul, vice president; C. E. Parker, secretary and treasurer; E. O. Webb, general manager, Joseph Schwartz is the foreman.

The foundry has been pronounced the most modern and up to date plant in the whole United States. Before a stroke of work was done on the buildings a mechanical engineering expert of the company was sent out on a six months tour of examination and investigation. He visited every large foundry in this country and Canada and studied every new arrangement and appliance. Everything which would contribute to making the Brainerd foundry the best in the country was carefully weighed and considered. When he returned his report was turned in and the architects and engineers drew their plans accordingly.

The result attained is most remarkable. Before any wheels moved in this great structure experts, foundry men, manufacturers, steel and iron men, special agents wishing to ameliorate working conditions, came to Brainerd and examined the foundry to see how the latest ideas in foundry management and equipment were carried out. And they were surprised. Technical journals devoted to the trade and many newspapers have commenced on the modern foundry which has been built and installed in Brainerd, for it embraces in concrete form the last word in up to date construction.

The motive power will not be steam. It will be electricity, used in all possible phases. Electricity when necessary, lights up the huge building. Electricity runs the presses, lathes, iron ratlers, emery wheels, elevators, the heavy lifting cranes and the little jib cranes, blows out the accumulated gases or dust, runs the blowers, takes the hot, flowing metal stream from the cupola, does all the drudgery work. A remarkable contrast may be noticed near the foundry. The new building exemplifies all that is new, labor saving and up to date. On the other side to the north is the old foundry occupied by the Parker & Topping Co. for many years, now rendered almost obsolete by the remarkable changes which have taken place in the new structure.

The building is about three stories

in height, measures 120 by 300 feet and is built on concrete foundations. Above the concrete are the brick walls. Steel work holds the roof in position. Heavy steel columns rise up on both sides supporting the roof. Light floods the place. Rows and rows of heavy skylights let the light in from above and walls of glass admit it through the sides. Many a store in the cities is not provided with the lighting arrangements which this foundry has.

The next feature noticed are the methods used for ventilating. Windows opening in sets can be opened at the skylights and on the sides, admitting all the air needed. Huge blowers cause a suction in the air and induce a circulation, throwing out the impure and bringing in the pure air. Dust collectors carry all the emery particles and other dust and eject it from the building.

A power house near by generates the steam to be used in winter to heat the building. This is piped to the foundry and on the second floor of the south side section enters a vast number of coils of steam pipe. Within a large sheet iron covering, the air is heated and then blown through hot air pipes at the ceiling down various ducts leading out of the central passage, heating the entire foundry and giving an equable temperature.

When one enters the foundry the visitor sees a small two story section to the north about in the center of the vast open space. This houses on the first floor the lavatory and closet system for the men. Running water within enables the men to clean up when through with work and is somewhat similar to the "dry house" for the miners of the Cuyuna iron range. Above with glass sides to the room, are desks and office rooms for officials of the foundry including the foreman, who seated at his desk, is able to have a clear and unobstructed view of the whole plant, something similar to the manager's or cashier's desk in a large department store.

Off to the southeast end of the building is a section devoted to the brass department. The floor is of cement. Here may be seen lathes, tool lathes, drill presses, emery wheels, brass ratlers and separators which separate steel from the brass, everything being run by electricity. Four small furnaces using coke and two large brass furnaces using oil are in the department. This fuel oil will later be stored in a storage tank outside of the building holding approximately 6,000 gallons. The oil will be pumped into the building by air. It is interesting to watch the operation of these two large brass furnaces. By turning a handle the cover may be raised, or the furnace may be tilted or lowered. The flame generated by the oil strikes an opening in the bottom of the furnace and peculiarly shaped bricks so divert the flame as to distribute it over the whole interior of the bottom of the receptacle. Adjoining are the rooms used for the storage of material. Babbit kettles are handled by electric cranes of one ton capacity.

Everything throughout the foundry is so arranged as to avoid in every manner possible all so-called heavy lifting by the men formerly made necessary in the old foundry. With the four small furnaces using coke a direct draft may be employed or, if necessary, a forced draft can be generated by motors.

Leaving the brass department and going north at the east end of the building one sees the scales used for weighing material and then another department in the northeast end of the building where three large iron ratlers are in position. They are used to clean cast iron. Two large emery wheels are near by with the dust collector so arranged as to carry away all emery particles and other injurious dust as previously described.

Continuing your walk along the north side of the building the lavatory and offices as mentioned are seen at the north center of the foundry. Within the foundry proper are the huge electric lifting cranes. There is a ten ton electric traveling crane, also a 2 ton crane and two 5 ton jib cranes. These can hoist the heaviest casting made or carry the metal from the cupola to wherever it may be required.

Adjoining the brass department to the south is the section devoted to the large cupola where the material necessary for casting is melted. It is a 78 inch shell cupola and on the second floor of this department, cement walled and steel sheeted for flooring, material is brought up in the elevator, weighed and proportioned for melting in the cupola or melting pot. This upstairs room is what is known as the charging room and the blower used to furnish the necessary draft is in an adjoining section. A bed of coke lies in the bottom of the cupola. A trough runs from its mouth on the ground floor and the electric cranes carry away the molten mass as it comes out glowing and hissing and tumbling into the waiting ladles. The cinder ratler is used to clean cinders from the casting material remaining.

To the west of the cupola are four large sized core ovens and a small core oven for drying molds, with carriages for all.

To the north in the west end of the foundry are the pits used for casting. When work is being done here by the molders it is a very interesting sight and one to which all visitors flock. One pit measures 10 by 20 feet and the other 5 by 24 feet. They are made of cement throughout.

Throughout all departments of the foundry, pattern shop and other buildings may be seen the coils of fire hose ready at a moment's notice to be uncoiled to fight fires. All electric wiring is encased in tubing and prevents any contact with dangerous wires.

To the south of the foundry are the foundry scales near the railway tracks on which all material is weighed and checked up before it enters the building, thus insuring a correct record of all articles and materials received.

Between the foundry and pattern storage house are numerous side tracks leading to scrap iron, sand and other sheds. A narrow gauge track runs from the south end of the foundry on which cinders will be transported to their proper place. Men are at work completing this track.

The pattern storage house is of brick and four stories in height. It is situated immediately south of the foundry. In it are stored the thousands of patterns used for locomotive and car castings. Few of these are duplicated at the Tacoma shops of the railway. They represent a value

(Continued on page four)

THE SECOND DAY OF MAKI TRIAL

Special Venire of 25 is Exhausted
and Talesmen are Taken From
Court Room

THE JURY COMPLETED AT 3:30

Special Venire of 10 Ordered by
Judge Stanton This Morning
Returnable at 1:30 P. M.

THE JURORS

1. W. H. Rosenkranz
2. George Bock
3. W. J. Hutchins
4. J. C. Hammett
5. H. V. Flansberg
6. S. P. Coffrain
7. W. H. Bolton
8. E. P. Slipp
9. C. N. Cannon
10. Perry Everett
11. Hugh Carmichael
12. Bert Baker.

All of Friday afternoon was consumed in examining the regular panel of jurors to find a jury to try Erick Maki, accused of the murder of Little Earl Edmund Reilly.

After C. E. Treglawny was excused George W. Wetherbee, of Crow Wing, was examined and excused on challenge. Henry Bouck was also excused.

J. C. Hammett, of Esdon, was accepted as a juror and made the fourth juror to sit in judgment in the Maki case.

G. R. Pratt was excused pre-emptorily by the defendant's attorney. H. V. Flansberg was accepted and was sworn in as a juror. This made the fifth juror obtained for the case. William H. Tuttle, L. B. Stewart and Carl Wheeler were excused.

The special venire of 25 was then drawn on. The first man in this venire, S. P. Coffrain, was accepted and sworn in. This made the sixth juror.

After that came two excused men, E. C. Burk and Fred Drexler.

W. H. Bolton was accepted and made the 7th juror.

Wm. Prentice, H. Turcotte, E. W. Dunn and Israel Potvin were excused. E. P. Slipp and C. N. Cannon were accepted and sworn in, making the 8th and 9th jurors accepted.

J. M. Quinn was excused preemptory by the state.

Perry Everett was sworn as a juror making the 10th man accepted.

John Davidson, A. L. Pratt, Ed. Levant and Anton Weber were excused.

This morning the balance of the venire of 25 was examined and out of these A. P. Nelson, R. D. King, George Reardon, J. L. Brady, Andrew Tollefson, Louis Godell and E. A. Storek were excused.

Hugh Carmichael, juror No. 11, was accepted.

The sheriff was then directed by Judge C. W. Stanton to call talesmen from the men present in the room and E. A. Leach, David Flansberg, Hugo Schwartzkopf, Claude Winters, Frank Ullien, D. D. Fenno, Arnold Cullen and V. L. Hitch were examined and excused.

The court then ordered a special venire of 10 men returnable at 1:30 this afternoon and Sheriff Reid and Deputy Sheriff Winters scoured the town for more jurymen.

The state so far has used three preemptory challenges and Maki's attorney 14. The statutes allow the state 10 and the defendant 20.

This afternoon the special venire of ten men furnished material for the prospective last juror. George Donant, Wm. Gildart, H. P. Dufium, A. G. Lagerquist, John Koop, Fred Ott, Fred Hagadorn, Elmer Hamse and Knute Narverson were examined and excused.

At 2:40 P. M. Adolph Anderson was examined as to his fitness to serve as juror. This is the last man in the venire of 10. Attorney Barron has now used 19 preemptory challenges.

GIVES REVIEW OF ASSEMBLY

Rev. W. J. Lowrie Will Speak Sunday Morning of Assembly Held at Atlantic City

On Sunday morning, Rev. W. J. Lowrie, pastor of the First Presbyterian church will use as his topic, "A Sermon Review of the General Assembly Held at Atlantic City." Rev. Lowrie was a commissioner to this assembly from the Presbytery of Red River and will give an account of the proceedings.

The lodge of the Modern Brotherhood of America will attend the evening services and will be addressed on the subject of "Things That Pass."

Nettleton Rents and Sells Houses Lots, farms, and negotiates farm and city loans. Office 506 Gardner block.

Attention Odd Fellows and Rebekahs All Odd Fellows and Rebekahs are requested to be present at their hall on Sunday, June 18th, at 9 o'clock A. M., for the purpose of marching to the cemetery to decorate the graves of our deceased brethren and sisters.

Also meet at 7:30 P. M. to attend the Methodist church where the memorial sermon will be delivered.

H. L. PAINE, Rec. Sec'y.
K. W. LAGERQUIST, Noble Grand. 1212

MAYOR ALLEGED TO LEAD SAFE ROBBERS

Special to Dispatch:

Benidji, Minn., June 17, 1911—Two men wounded, one a prisoner and the other trailed by dripping blood from his injuries into the forest where he had fled, and a warrant out for the arrest of Dr. E. D. Dumas, the mayor of Cass Lake, on the charge of being the head and brains of a clever crowd of safe robbers is the dramatic culmination of one of the most clever pieces of detective work staged here or in the northwest by J. C. Fielding, of the Minneapolis Pinkerton detective agency.

The crisis of the episode came at 1:30 this morning. Two safe robbers, Curly Davis and Billy Bean, were trapped by detectives while in the act of cracking the safe at Pup-osky, 18 miles north of Benidji.

A fierce battle followed between the two safe crackers and seven detectives in which the two bandits were wounded and one was captured.

Funeral of Annie Mary Olson

The funeral of the late Annie Mary Olson took place yesterday afternoon from the residence at 2 o'clock, and from the Swedish Mission church at 3 o'clock, Rev. Karl A. Lundin, of the Swedish Baptist church officiating. The funeral was very largely attended by friends and relatives of the young girl. Interment was in Evergreen cemetery.

Death of a Baby

The infant daughter of Mr. and Mrs. Martin Anderson, of Southeast Brainerd, died Friday afternoon at 5:30 of some infantile disease. The funeral was held this afternoon from the undertaking parlors of Losey & Dean. The sympathy of their many friends is extended the family in its sad bereavement.

Card of Thanks

We wish to thank our friends, the N. P. clerks and the employees of the store department of the shops for the flowers, and their kindly sympathy shown us at the death of our little one.

Mr. and Mrs. Martin Anderson.

days. On Sunday there are meetings at 11 A. M., 3:30 P. M. and 8 P. M. All meetings preceded by open air services. All are welcome. Officer in charge.

THE NEW FOUNDRY HAS TRIAL RUN

(Continued from page three)

In dollars which can hardly be estimated.

"There is nothing which would cripple the Northern Pacific railway more than the loss of these patterns," said Mr. Webb, as he showed the party of visitors through the shop and explained the various features of the industry. Electricity runs the elevator in this building and carried the visitors swiftly to the fourth floor. All the floors and ceilings of this structure are made of cement. Even the stairways are reinforced cement. Safety gates, opening and closing automatically, will soon be installed and insure additional safety to employees while working near the elevator shaft. The roof is of tarred gravel and affords a splendid view of Brainerd and its vicinity. Fire hose is on every floor and can be quickly reached to extinguish any incipient blaze.

Adjoining and a part of the building to the east side is the pattern makers shop, with its cement floor thoroughly lighted from ceiling and walls. Here will be made all the additional patterns called for by the railway company and rendered necessary when changes are made in equipment.

"At the present time about 150 men are in the employ of the foundry," said Mr. Schwartz, the foreman. "As soon as the machinery gets to running well and it becomes necessary to increase the force more men will be put on." With a large number of orders on hand the foundry can give employment to over 300 men.

Monday, June 19th, may be considered as the first work day in the new foundry. Casting will be done and it will make an epoch in foundry history, not only in Brainerd but the country at large.

A Charming Woman

is one who is lovely in face, form, mind and temper. But its hard for a woman to be charming without health. A weak, sickly woman will be nervous and irritable. Constipation and kidney poisons show in pimples, blotches, skin eruptions and a wretched complexion. But Electric Bitters always prove a godsend to friends. They regulate Stomach, women who want health, beauty and Liver and Kidneys, purify the blood; give strong nerves, bright eyes, pure breath, smooth, velvety skin, lovely complexion and perfect health. Try them. 50c at all druggists.

GOOD WORK

Done Daily in Brainerd. Many Citizens Tell of it

Nearly every reader has heard of Doan's Kidney Pills. Their good work in Brainerd still continues, and our citizens are constantly adding endorsement by public testimony. No better proof of merit can be had than the experience of friends and neighbors. Read this case:

Mrs. J. H. Zellers, 913 Main St., Brainerd, Minn., says: "I never tire of recommending Doan's Kidney Pills, for they have been so beneficial to me. Some years ago I publicly endorsed them and at this time I am willing to do so again. I took Doan's Kidney Pills when I was afflicted with kidney complaint and they gave me prompt relief. One of my relatives who also suffered from kidney trouble, used this remedy with the best of results."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—take no other.

General Agent
430 West Superior Street
Duluth, Minn.

ORDINANCE

An ordinance to provide water mains, reservoirs and water works in the Village of Crosby as a means of water supply for the welfare of the inhabitants thereof, and as a measure for the prevention and extinguishment of fire therein, and to regulate the use thereof.

The Village Council of the Village of Crosby do hereby enact the following:

SECTION I.
For the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the purpose of providing a means of water supply for the Village of Crosby, and for the purpose of preventing and extinguishment of fires therein, and for the purpose of the benefits to accrue to the Village of Crosby, and the inhabitants thereof, from the erection and operation of water works, the Village Council, Minnesota, and to its successors, lessees, and assigns, hereinafter referred to as the Village Council, do hereby enact the following ordinance, to be known as the ordinance for the
